Save the Unborn

Hello! My name is Trevor Grace. This election I'm standing as an Independent candidate for Save the Unborn. Why?

As a high school teacher and parent, I can appreciate community groups and political parties protesting against the killing of whales and rallying to save our River Murray. But I find it incredibly disturbing that we can do all of this, while not one single party has had the courage to stand up against the systematic killing of unborn babies in this State.

Trevor Grace

It has been said, "A society's greatness is measured by the way it treats its weakest members." So, how do we treat our smallest and most defenceless fellow human beings?

To start with, nearly 5,000 babies are aborted every year in South Australia – without pain relief! After being aborted, their little bodies are disposed of into 'medical waste' bins and later incinerated. Yes! And we do this knowing that even at 8 weeks (and most are aborted around this age or older) an unborn baby is already a small-scale baby, with facial features, arms and legs, fingers and toes.

The reality is our laws allow infants to be aborted up to 28 weeks! Or to say it plainly: we abort growing babies who are already reacting to light, noise and even pain. Babies who are kicking, doing somersaults, sucking their thumbs, smiling and much more.

Unborn 22 weeks

Around 97% of abortions are carried out on healthy babies – whose mothers are physically healthy, by methods so cruel that I'm reluctant to describe here.

([google abortSA.com](http://google.abortSA.com) click abortion techniques, see 'Dilation & Evacuation' & 'prostaglandin')

Imagine a mother going in for an abortion with a baby visibly kicking and jumping in her womb — and an hour later the child is dead. If we killed this child lying in a hospital incubator it would be considered murder, but somehow it is different in the darkness of the womb.

Just as ironic, we have a Health Authority Warning on cigarette packets stating: **SMOKING HARMS UNBORN BABIES**, when we not only kill healthy babies in the womb (20 weeks and over), but also leave babies to die while gasping for breath after a botched abortion.

In South Australia, babies are actually surviving abortions – but are then left on tables to die. How long do these babies breathe for? It is difficult to know precisely. But up to 14 aborted babies are 'born alive' every year in our State.

(Listen to abortion survivor Gianna Jessen's true story, Parliament House, Melbourne, 2008:
<http://www.youtube.com/watch?v=kPF1FhCMPuQ>)

Gianna Jessen

Do we hear about these deaths or the other horrors of abortion? Of course not! It is too confronting. But we know in our soul the killing of babies in the womb or leaving them to die while struggling for breath is profoundly wrong. It is a terrible injustice — an injustice that betrays the most weak among us!

This election, be a voice for those who have no voice!
